

TACTICAL CONTROL SYSTEM PRELIMINARY DESIGN REVIEW

Tactical Control System Preliminary Design Review

Part 2 - Day 1

Outrider Data Control Module (ODCM) Hardware Configuration Item (HWCI)

3 February 1998

Prepared By:
Alliant Techsystems

Hopkins, Minnesota 55343-8384

TACTICAL CONTROL SYSTEM PRELIMINARY DESIGN REVIEW

ODCM HWCI AGENDA

- Function
- Design Description
- Requirements Compliance

TACTICAL CONTROL SYSTEM PRELIMINARY DESIGN REVIEW

ALLIANTTECHSYSTEMS

ODCM Function

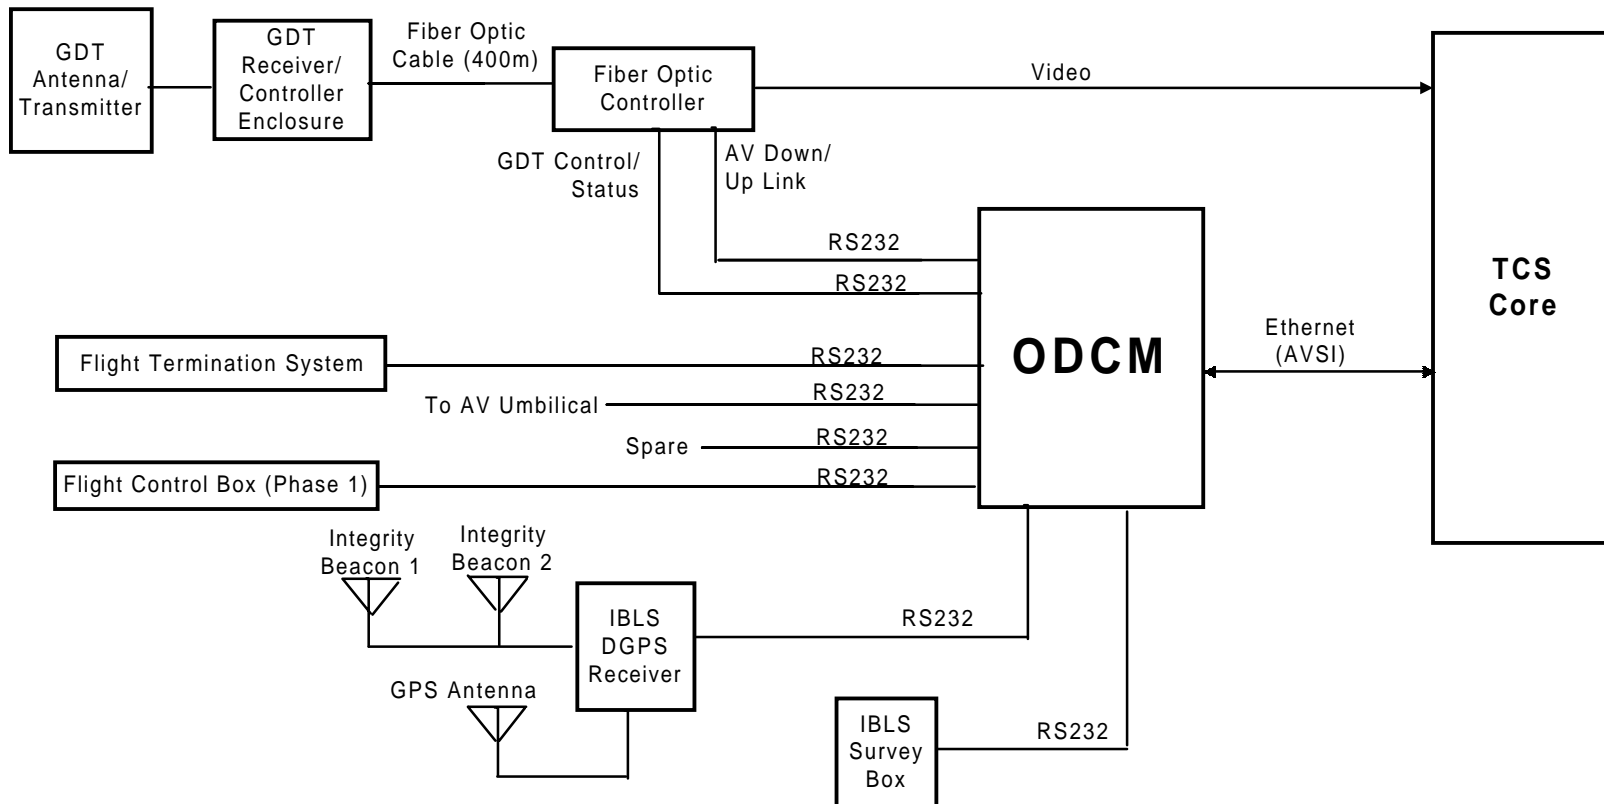

- The ODCM translates AV commands, control, and telemetry between TCS Core and Outrider-specific formats
- The AVSI specifies requirements for TCS Core - ODCM interface
- ODCM tactical hardware must meet requirements per HWPS (in process - NSWCCD):
 - performance
 - environmental
 - EMC
 - “ilities”
- Draft DCM Hardware Development Specification (7-7-97) is latest published guidance on tactical DCM hardware requirements
- Compared Phase 1 DCM selection to 7-7-97 spec to identify needed growth areas

TACTICAL CONTROL SYSTEM PRELIMINARY DESIGN REVIEW

TACTICAL CONTROL SYSTEM PRELIMINARY DESIGN REVIEW

ALLIANTTECHSYSTEMS

ODCM Hardware Selection Status

- Current ODCM software hosted on TAC3 UNIX workstation for initial development
- Software to be re-hosted on tactical form factor hardware by June 98 (Demo 2A/B)

Considerations

- Low schedule and technical risk
- DCM hardware development specification (7 July 97 - draft)
- DCM hardware implementation left to contractor
- Evaluate both UNIX and RT O/S VME approaches
- TCS RTP to be VME

Selection

- Selected HP Model 748/132L VME Industrial Workstation for Phase 1
 - uses HP 744 Single Board Computer and HP-UX 10.20
 - meets DCM tactical form factor requirements
 - ruggedized
 - COTS

TACTICAL CONTROL SYSTEM PRELIMINARY DESIGN REVIEW

- growth path to meet evolving Phase 2 tactical environmental requirements

TACTICAL CONTROL SYSTEM PRELIMINARY DESIGN REVIEW

ALLIANTTECHSYSTEMS

Phase 1 VME ODCM

**HP Model 748
Industrial System**

TACTICAL CONTROL SYSTEM PRELIMINARY DESIGN REVIEW

ALLIANTTECHSYSTEMS

ODCM Hardware Configuration

Item	COTS Vendor	Description	Quantity per System
VME Chassis/ Power Supply	HP	Model 748/132L, industrial grade, 8 VME slots, 19" rack mountable	1
Processor Card	HP	744/132L SBC, 132 MHz, 32 MB DRAM	1
Memory Card	HP	64 MB DRAM	1
Hard Drive	HP	4 GB, SCSI-2	1
CD ROM Drive	HP	CD-ROM drive, 12X, SCSI-2	1
I/O Card	RTP	Serial, RS-232, 4-channel	2
Operating System	HP	HP-UX 10.20	1
Floppy Disk Drive	HP	1.44 inch, SCSI-2	1
Monitor	HP	17", color	1
Keyboard/Mouse	HP	Standard keyboard and mouse	1

Physical/Power Performance

Parameter	748 Characteristic	7-7-97 DCM H/W DS Rqmt	Complies
Dimensions			
Rack Mountable	in standard 19" rack	in standard 19" rack	Yes
Height	12.22"	10.47" minimum	Yes
Width	16.75"	15.72" maximum	Discuss rqmt
Depth	16.24" plus Standard Connector Area	18"/22" min/max (includes Standard Connector Area)	Yes
Weight	est. 65 lbs	not specified	--
Power			
Input Power	Auto-ranging, 90-132V, 180-250V, 50-60 Hz	120 V, 50-60 Hz	Yes
Power Consumption	1080 Watts max	1200 Watts max	Yes
Power Control	Protected ON/OFF switch	Protected ON/OFF switch	Yes
Power Indicator	Power ON indicator	Power ON indicator	Yes
Power Protection	Circuit breaker - front panel	Circuit breaker - front panel	Yes
Grounding	Ground lug on rear panel	Ground lug on rear panel	Yes

Environmental Performance

Parameter	748 Characteristic	7-7-97 DCM H/W DS RQMT	Complies
Operating - Random Vibration	0.2 g ² /Hz; 5-350Hz, 0.3 rolloff @ 6dB/Octave to 500Hz	Operating: No degradation while operating in TBD mechanical environments	TBD
Mechanical Shock	Operating, end-use handling shock 150 cm/s (60in/sw) using <3 ms ½ sine wave (1230 ms/2 faired acceleration)		
Survival - Random Vibration	0.2 g ² /Hz from 5-100Hz, 0.2 rolloff @ 6dB/Octave to 137Hz; 0.0107 g ² /Hz from 137-350Hz, rolloff @ 6dB/Octave to 500 Hz	Non-operating: No degradation during TBD Ground and Transport mode environments	TBD
Survival - Swept Sine Vibration	10m/s ² (1G0-pk) from 5-500Hz, sweeping at 1 Octave/min, dwell 10 min. at 4 lowest freq's; 20m/sw (2G0-pk) from 10-150Hz, 10 sweeps at 1 Octave/min		
Survival - Transportation Shock	(unpacked) 295 m/s ² minimum (>30G) using 605cm/s (238in/sec) trapezoidal wave		
Survival - Packaged	Drop height = 24 inches (61 cm)	No degradation after 48" drop in	TBD

Electromagnetic Compatibility

Parameter	748 Characteristic	7-7-97 DCM H/W DS Rqmt	Complies
Radiated and conducted emissions	FCC Class A, 47 CFR Parts 2 & 15; VCCI Class A; ITE-EN55022/CISPR22 Class A; ISM-EN55011/ CISPR11 Class A	Enclosure shielding iaw FCC Part 15	Yes
Magnetic emissions	49 CFR, IATA Dangerous Goods Regulations, 30 ed – < 2 milligauss at 2.1 m		
Radiated immunity (IEC 801-3 level 2)	ITE/ISM-EN55024-3 – 3V/m	EMI: No degradation after exposure to 200 V/m at frequencies to 18 GHz	TBD
ESD immunity	ITE-prEN55024-2 – 3/8KV CD/AD; ISM-prEN50082-2 – 4/8KV CD/AD; 15KV AD (op.), 25KV AD (survival)		
Magnetic immunity	317 A/m (4 Gauss), exceeds IEC 801-8 level 5 – 100 A/m		
Line transient immunity	Conducted fields IEC 801-6 level 2 – 3V rms		
Fast transients	ITE/ISM-prEN55024-4, IEC 801-4 levels 3 – 2KV mains, 1KV ports		
Surge transients	IEC 801-5 level 3 – 1KV DM, 2KV CM; 3KV pk. Ring wave DM/CM		

TACTICAL CONTROL SYSTEM PRELIMINARY DESIGN REVIEW

Environmental Performance

- The remaining environments specified in the DCM Hardware DS draft (7-7-97) are
 - Rain
 - Snow
 - Icing
 - Fungus
 - Salt Fog
 - Wind
 - Blowing Sand and Dust
 - Lightning
 - Applications prohibiting air cooling/requiring conduction cooling
- The ODCM tactical hardware will be specified as appropriate to meet the above environments once the DCM Hardware Performance Specification is released.
